Health, Safety, Environment (HSE)

Revival Tar Surfacing is committed to environmental protection. The company ensures full compliance with applicable legal and regulatory requirements while integrating sustainable and environmentally responsible practices into all operations. Environmental aspects and impacts are systematically identified, evaluated, and controlled through structured Environmental Impact Assessments, with a focus on continual improvement and lifecycle thinking. Management is accountable for establishing, implementing, and monitoring controls to mitigate significant environmental risks.

Revival Consolidated Projects prioritises the health, safety and wellbeing of all employees and stakeholders. A zero harm objective underpins all activities, supported by proactive hazard identification, risk assessment, and the implementation of hierarchy of controls. Risk based thinking is embedded across operations, with defined procedures, competency training, and performance monitoring ensuring effective risk mitigation. Management retains responsibility for ensuring a safe working environment, eliminating hazards where practicable, and reducing occupational health and safety risks through continuous improvement.
